SUITESLIDE™
Sliding Barn Door Systems

specADsystems.com

SuiteSlide™ is an economical surface-mounted, sliding barn door system including the door slab, specialty frame and commercial grade hardware for superior quality and convenience. The SuiteSlide system is perfect for residential care facilities, multifamily residential and hospitality projects that don't require acoustic mitigation or advanced hardware functionality.

Like all AD Systems sliding door systems, SuiteSlide is a single-source door assembly designed for beauty and built for resilience. The door system comes standard with AD Systems' "soft close" technology, concealed sill guide, and flush pull hardware. Optional privacy lock available.

AD SYSTEMS SUITESLIDE™ STANDARD FEATURES:

- Space-saving design saves up to 30 sq ft, when compared to a swing door
- AD Systems' custom extrusion features dual soft gasket seals that compress, ensuring the frame is plumb including when uneven wall conditions are present
- Heavy-duty, top-hung roller system for smooth, maintenance-free operation
- ADA-compliant operation
- Soft-close dampening system ensures quiet and safe operation
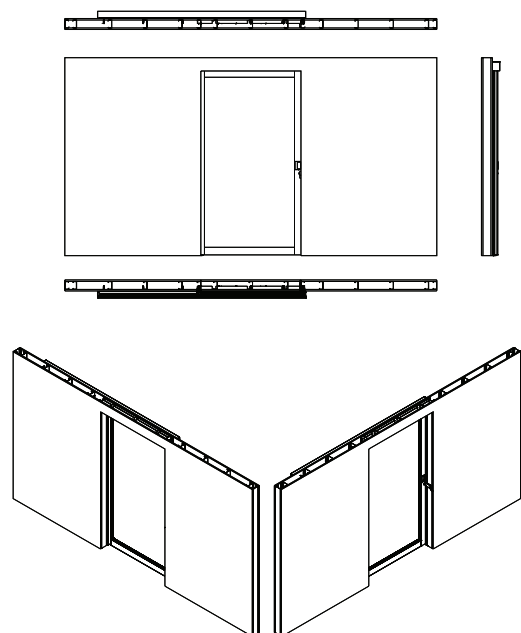

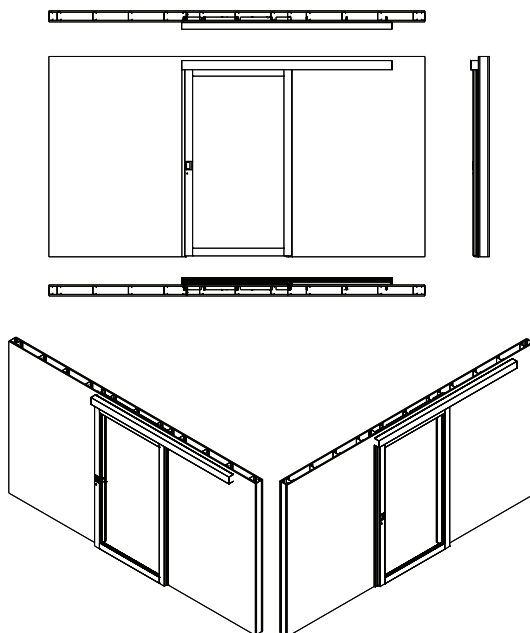

Options
